RAISING WAR FUNDS **BIG FINANCE FACTOR**

Wall Street Interested in the Methods to Be Employed by the Government.

It is not surprising, perhaps, that more or less radical ideas should develop with respect to taxation to raise funds for purposes of war at a time of crisis such as this country is now facing. The Secretary of the Treasury calls for an appropriation of \$3,401, 684.87, of which sum all but about \$1,000,000 is to be used for military and naval expenditures. This money will enable the Government at Washington to put the army and navy on a war footing. But the question which interests Wall Street most is, of course, the methods to be employed in raising these funds.

It has been a matter for wonder ment that the bankers of the country have not been more fully taken into the Government's confidence in an advisory capacity, as has been so freely done in other phases of the prepared-ness movement. Financing ourselves and aiding the allies with our ample means is a project of the first impor-tance, since the entente's greatest need at this time is for credit and supplies and the facilities for adequate transportation. Neither the army scarcely at all nor yet the navy fully is prepared to jump into the fray. Therefore, we must help with money and supplies now while getting ready our military and naval forces.

Financing War Big Factor. So the big factor at this moment is the raising of funds. It is felt quite justly that a portion of the money required should be raised by long-term bond issues so that the generations to come should bear a part of the bur den of this mighty conflict between democracy and autocracy, a success ful issue to which will benefit succeed ing ages. Two billion dollars could be made immediately available in this way, it is estimated, at a rate of in-terest approximating 3 to 3½ per cent. It is proposed to fix the inter-est rate now and adhere to it as close-

cest rate now and adhere to it as closely as may be for future issues. The sale of \$25,000,000 State bonds this week would seem to indicate success for Federal issues.

There is, however, a most wholesome dealire on the part of Washington to raise as much money by means of taxation as would not be unduly burdensome for the present generation. It is in this connection that radical ideas have been put forth. Money raised by taxes for war purposes is to be spent. Every citizen should be given the privilege of contributing something; hence it is fair, perhaps, that the income exemption should be lowered so as to include incomes of \$2,000 or even less. War profits should be taxed with due care that industry may not be discouraged on hampered. Incomes derived from accumulated funds should be taxed at a higher rate than incomes derived from wage earning, is a suggestion from wage earning, is a suggestion frequently heard.

Suggestions For Raising Funds. It is suggested that no man during the war should enjoy an income in excess of \$75,000 or \$100,000.

All of these references to sugges tions advanced in the past few days are intended merely to draw attention to a state of mild confusion as to procedure, natural in this period of excitement. They also serve to emphasize the united support which the whole country is prepared to render to the President in a righteous fight. The resolutions were introduced by the enthusing turner emphasized by the enthusing which every form of help

Industrial mobilization is going on It is estimated that over 32,000 plants have been offered to the and it is important to remem ber that these plants are ready at once to turn out munition and other supplies, thanks to the industrial expass two years or more. The new for our associations, we renew again phase of our entrance into the war will give impetus to industry, altonight, as national Americans at the United States, our altonic company. This employment, it was believed to the United States, our altonic company. ension with a war complexion of the past two years or more. The new though there can be no longer a question of the large profits which have been forthcoming from the European belligerents. Reasonable profits only can be derived from this country's necessities, and the same considers tion for our allies would furnish supher true in the crisis to the mission he considered his duty. plies to them at the same rate.

Bolster To Stock Market. Although Congressional debate and

obstructive tactics on the part of a small group of unpatriotic legislators prevented prompt action on the war resolution so much to be desired for its influence on both camps of Europe, the measure has gone the measure has gone utilities committee that the street car through both branches with majori-ties that can leave no doubt of the unanimity of the people's sentiment. The stock exchanges and the other exchanges were closed in observance of Good Friday, so there was no securities market to be affected by the

That a state of war actually exists is likely to be momentarily disturb-ing, but majority opinion in Wall Street leans to the view that the stimulation to trade and industry will act as a bolster to the stock market, particularly when it is re-membered that prices have snown all along a consistent resistance to pres-sure. There have, indeed, been slnking moments, but prices invar-iably have rebounded. Prior to Fri-day the stock market was more or confused. Trading was only moderately active, with now and then considerable selling inlative. Doubts as to our financial measures unquestionably caused such weakness as was apparent. Otherwise, trading was wholly in the hands of the professional elment.

Pull Financial Co-operation. The bond and foreign' exchange markets more closely reflected cur-

rent conditions. Following the President's message to Congress, there was immediate response by increased activity in the foreign loan issues and a general stiffening of prices. A firmer undertone developed in sterling rates, and there was distinct strength in French and Italian rates, particularly following the reduction in the minimum discount rate of the Bank of England from 5½ per cent to 5 per cent, the former rate having prevailed since the middle of Janu-

This circumstance signified that Great Britain deemed she could relax her exertions to keep the sterling rate stable, and indicated full finan-cial co-operation during the period of the war. Plans already have been church will be conducted by Knights made for a British commission to visit this country in the near future to hold a council of war.

companies had asked the District Commissioners to construct shelter sheds at street car tranfer corners, the public utilities committee was in-structed to investigate why the street car companies had removed the old

street car sheds. For Universal Transfers.

The universal transfer system in the District also came up for discussion. It was decided upon recommendation of William McK. Clayton that any action of the Federation be postponed until the physical valuation of the street car lines be completed. It was stated that this physical valuation probably would be completed within thirty days. A committee of five will be ap-

pointed to co-operate with President Charles S. Shreve to obtain from all the citizens' associations names of those who will serve in the new Home Guard of the District.

TO DOUBLE TRACK ROAD

The Safest Investments Are those that do not fluctuate during dis-turbed conditions of the money or store mar-hets. First deed of trust notes iffrat mort-gages), well secured or real estate in the District of Columbia, constitute "gill-edge" investments, and they do not depend upon the financial responsibility of individuals or cor-perations for their stability. We can supply such investments in amounts from Edge up-ward. Send for bookiet, "Concerning Losus and Investments."
